

China Ship Building Summit 2007

Adapting the Global Innovation of Ship Building Model and Technologies to Achieve a
Prosperous Future for China Ship Building Industry

October 18th-19th

Four Points by Sheraton Shanghai, Daning

Inviting & Confirmed Speaker Panel

Zhang Guangqin

Chairman

**CHINA ASSOCIATION OF THE
NATIONAL SHIPBUILDING INDUSTRY**

High Representative

**MITSUI ENGINEERING &
SHIPBUILDING CO., LTD**

Liang Shenghao

Associate Executive Director

SAMSUNG HEAVY INDUSTRIES

Sun Yunfei,

Chief Financial Controller

**CHINA STATE SHIPBUILDING
CORPORATION**

Tim Harris CBE,

Chairman

CLARKSONS CORPORATION

Senior Official

Administration Office of Ship Building
Industry

**COMMISSION OF SCIENCE
TECHNOLOGY AND INDUSTRY FOR
NATIONAL DEFENSE**

Huang Pingtao

Chairman

**CHINESE SOCIETY OF NAVAL
ARCHITECTS AND MARINE
ENGINEERS**

Cheng Zhihu

General Manager

CHINA CLASSIFICATION SOCIETY

Bertram Rickmers

President

RICKMERS GROUP

Hakan Friberg

Managing Director

**SWEDEN SHIPOWNER'S
ASSOCIATION**

Zhou Jianneng

Director

JINLING SHIPYARD

High Representative

**KAWASAKI SHIPBUILDING
CORPORATION**

Organized by

Media Supporter

- 0830 Registration**
- 0850 Opening address from the Chairman**
- 0900 SESSION ONE**
Exploring the Trend of Development in China Ship Building Industry
- The domestic oil import
 - Iron Ore demand
 - China becomes the 3rd biggest trade country
- Zhang Guangqin, Chairman**
CHINA ASSOCIATION OF THE NATIONAL SHIPBUILDING INDUSTRY
- 0945 SESSION TWO**
Accelerating the Construction of Modernistic Shipbuilding Model in China
- Improving the design technology
 - Optimizing the production technological process
 - Improving the construction of informatization
 - Applying advanced ship building technique
- Senior Official, Administration Office of Ship Building Industry**
COMMISSION OF SCIENCE TECHNOLOGY AND INDUSTRY FOR NATIONAL DEFENSE
- 1030 Morning refreshments & networking break**
- 1100 SESSION THREE**
Gaining More Profit through Advanced Lean Ship Building System
- Introduction of lean ship building system
 - Analyzing the product value chain
 - One piece flow construction procedure
 - Just in time and built-in quality
 - 4S, Precision and total plant control
- Takao Motoyama, President**
MITSUI ENGINEERING & SHIPBUILDING CO., LTD
- 1145 SESSION FOUR**
Accelerating the Localization of Ship Equipment in China to Meet the Demand of China Ship Building Industry
- More than 10-years gap between China and international advanced level
 - Strategy to conquer the difficulties
- Huang Pingtao, Chairman**
CHINESE SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS
- 1230 Luncheon**
- 1330 SESSION FIVE**
Predicting the Future Price of New Ships through Analyzing the History Price Indexes
- Review of history price indexes
 - Influence of the fluctuation of foreign exchange rate
 - Statistics of manufactory cost of new building ship
- Tim Harris CBE, Chairman**
CLARKSONS CORPORATION
- 1415 SESSION SIX/ CASE STUDY**
Building the Very First LNG Ship to Fill in the Technical Blank of China Ship Building
- Conquer the difficulties of design
 - Compact Corporation between Foreign Shipyard
- Ma Guodong**
President
HUDONG-ZHONGHUA SHIPBUILDING (GROUP) CO., LTD
- 1500 Afternoon refreshments & networking break**
- 1530 SESSION SEVEN**
High-Quality Steel Applied in Ship Building to Meet the Domestic Demand
- Introduction of latest development of steel used in ships
 - Economic efficiency of the new product
 - Case study
- Speaker to be confirmed**
- 1615 SESSION EIGHT/ PANEL**
Revolution and Innovation: Building Hi-tech Specialized Ships to Meet the Demand of International Shipping Market
- The present condition of the design and production of specialized ships
 - Support from government to develop the specialized ships
 - Perspective from China ship owners: outlook for domestic specialized ship buildings
 - Enhance the communication and corporation with foreign companies
- 1700 Closing remarks from Chairman and end of Day One**

China Ship Building Summit 2007

Day Two, October 19th , Friday

0830 Registration

0850 Opening address from the Chairman

0900 **SESSION ONE**

Measuring the Global Shipping Market: the Impact on China Ship Building Industry

- The overview of the global shipping market
- Review of world ship's market in 2006
- The timing for China ship building industry

Hakan Friberg, Managing Director
Sweden Shipowner's Association

0945 **SESSION TWO**

An Update of Latest Information of the Coating Technology Standard of Ship Anti-Corrode

- Background review
- The introduction of the standards
- Importance of the standards
- The apply of the draft standards

Cheng Zhihu, General Manager
CHINA CLASSIFICATION SOCIETY

1030 Morning refreshments & networking break

1100 **SESSION THREE**

Improving the Design Technology to Meet the Particular Requirements from Ship Owners

- Over view of Korean strength of ship design
- Individualized service for the ship owners
- Case study

Liang Shenghao, Associate Executive Director
SAMSUNG HEAVY INDUSTRIES(NINGBO)

1145 **SESSION FOUR/**

Strengthening the International Competitiveness by the Digital Ship Building

- The development of digital ship building in Japan
- Digital application during the design process
- Digital management during the purchasing
- Digital construction of ships

Tomokazu Taniguchi, Director
KAWASAKI SHIPBUILDING CORPORATION

1230 Luncheon

1330 **SESSION FIVE**

Applying Advanced Welding Technology in Ship Building, Shiprepairer & Maintenance

- Introducing advanced welding technology in the world
- Different patterns of welding technology
- Welding technology in ship building, shiprepairer and ship maintenance

Fred Delany
Technology Manager
THE WELDING INSTITUTE

1415 **SESSION SIX**

Developing Innovative Financing Model to Solve the Capital Shortage- Mortgage of Under-Construction Ships

- The introduction of mortgage of under-construction ships
- Difficulties during the operation
- Sharing the experience of the finance model

Ma Bihai, Director
JINLING SHIPYARD

1500 Afternoon refreshments & networking break

1545 **SESSION SEVEN**

Applying Antifouling Coatings to Achieve Energy Efficiency and Environment Friendly

- New advanced coatings
- Coating technology
- Economic efficiency of the coatings

Speaker to be confirmed

1630 **SESSION EIGHT/PANEL**

Is the Industry Chain Integration an Ultimate Scenario of Ship Building Industry?

- Domestic trend of industry chain integration
- Case study
- Opinions of foreign experts

1730 Closing remarks from Chairman and end of Day Two

Why you should attend

- Listen to the showcases from the domestic and foreign shipyards
- Get timely presentations regarding latest information of design concept, material development and operation technologies of ship buildings
- Acquaint with the government officials, decision makers in the industries and international experts face to face
- Understand the current condition and future plan from China government about the ship building industries
- Analyze the global market and help you to find potential clients
- Make brilliant investment through the communication with the decision makers

Who should attend

- Government Representatives
- Classification Societies
- Dredging Companies
- Savage Bureau
- Shipyards
- Ship Equipment Manufacturers
- Ship Design Institutes
- Ship Owners
- Ship Project Management Companies
- Ship Import/Export Companies
- Ship Brockers
- Investor and Banker
- Law Firms

About Merisis

Merisis Consulting Company limited is a business information company providing services for top 1000 companies in Asia-pacific. Our solutions are delivered through a wide variety of events for business strategies of world's fast developing market strategic insight and access to a host of entrepreneurial communities. Through our expertise and international networks, talents and resources we focus on delivering solutions efficiently and professionally for companies and organizations in Asia-Pacific Region
